Number of Employees in the Different Field that Travel

Age vs Education Field

In the HR Field, there is a wider range of employers that are between the ages 35 to 40.

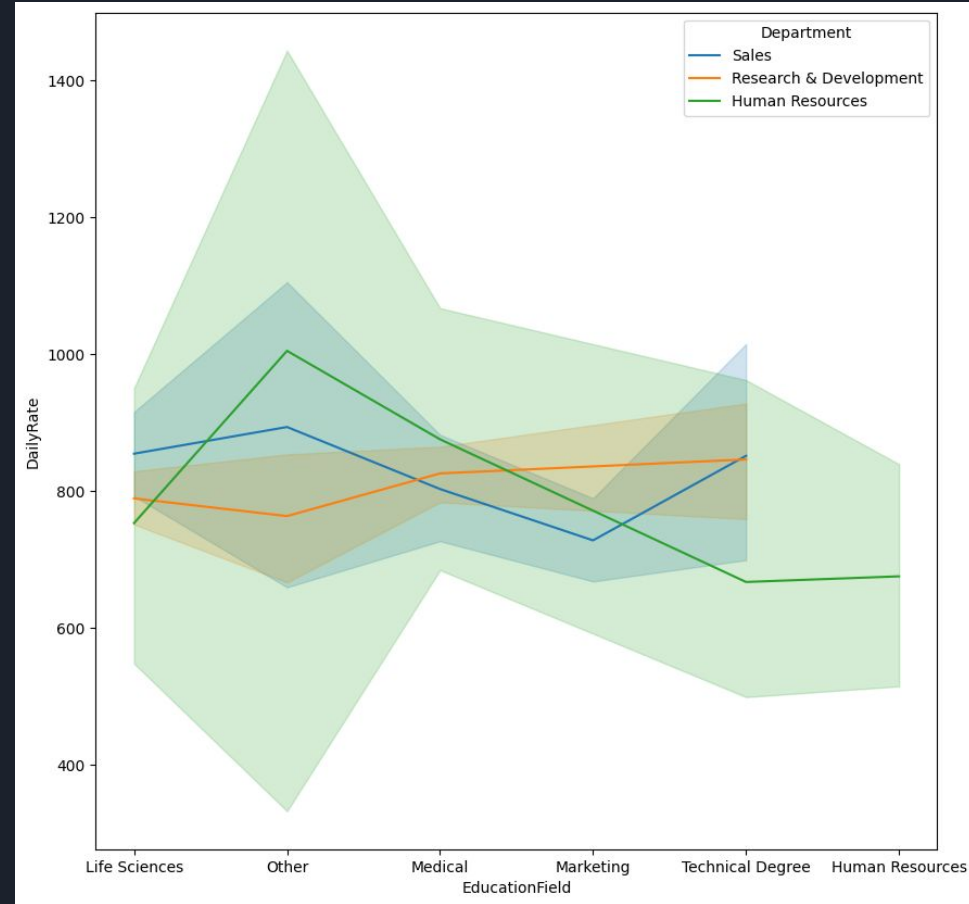

For the technical degree, the age ranges between 34 to 37.

Most of the field has an age that between the low to mid 30s to low 40s.

The department that has the highest daily rate is the other field. The daily rate decreases or is a steady rate throughout the other field in the different department like the technical and the HR field.

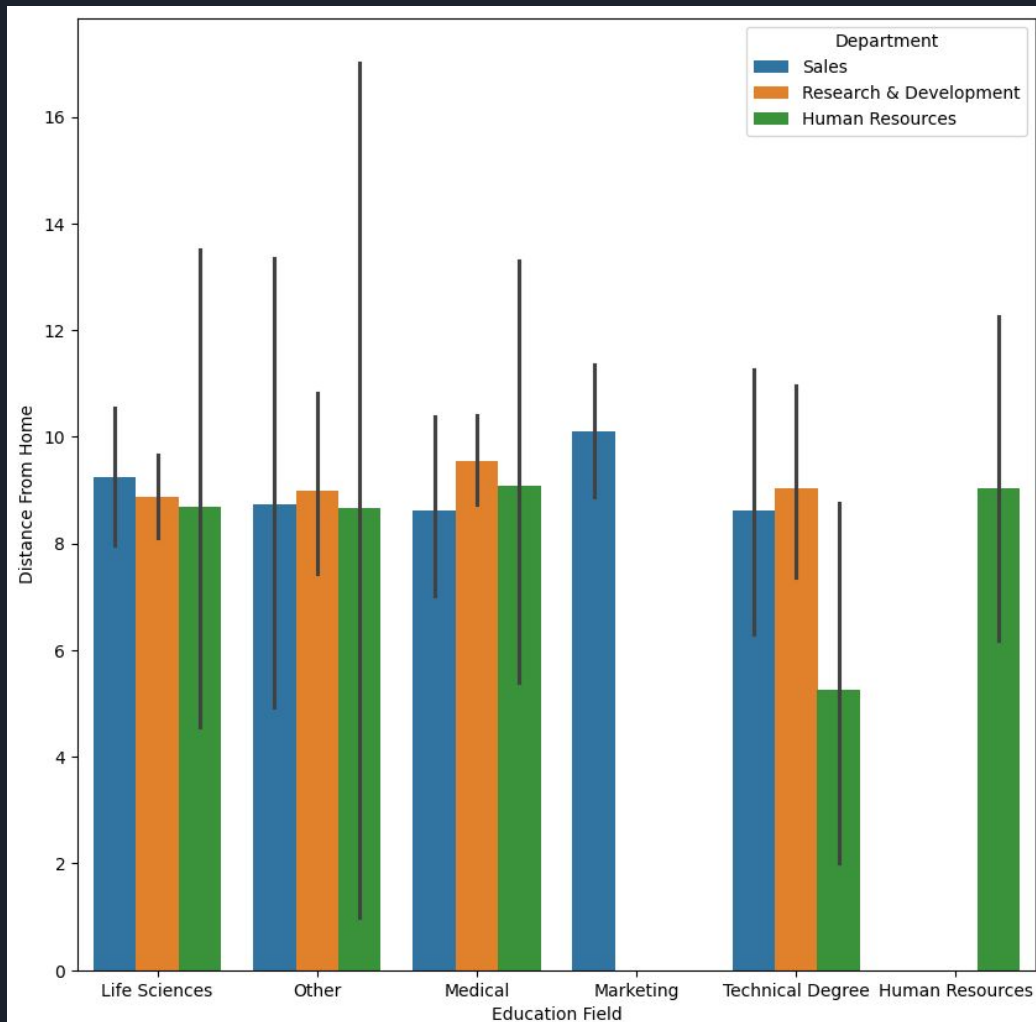

Daily Rate for the Different field and department

Distance from Home

Most of the employers are not far from home, not sure of the units for the distance, most of the employers are less than 10 miles or km away.

The HR with a technical degree is about less than 6 miles or km away.

Summary

Overall, the male and female as diversified in different department and most have different background that are mostly related to what the employer most likely studied. Most of the employers that has different educational background has either a steady pay rate or a high paying job. Most of the employers are HR related but their background may be something else. The age of the employers ranges from the low to mid 30s to the low 40s in different education field and departments. Lastly, most of the employers does not travel or rarely travels.
